Make online safety simple with cloud-based web filtering

As a school, ensuring your students have access to the internet is a necessity. But making sure that access is being used safely and wisely is where things can get complicated.

Securly Filter is a cloud-based web filtering solution developed specifically for schools. With Securly Filter, you gain the flexibility and ease of use you need to keep your students safe and out of harm’s way, regardless of location or device. Plus, you’ll have your own industry-leading customer support team at the ready.

For many, web filtering is about CIPA compliance. But any filter will provide that. With Securly Filter, you can:

- Ensure CIPA compliance — without expensive appliances or complicated setup
- Get the filtering features you need to make your job easier
- Gain visibility and control over all devices regardless of location

Now included with Securly Filter!

- **AI Chat for Securly Filter**
  Teach students how to responsibly use AI
- **Securly Reveal**
  Collect and analyze real-time usage data to make smarter edtech decisions

“We chose Securly Filter to provide an appliance-less, scalable, and CIPA-compliant solution to protect our students. I’m not sure where we would be without Securly in our district. It has become part of our culture and provides us the additional support we need.”

Tom Walker, Director of Technology
Massac Unit School District #1
Benefits

- Simplify deployment and maintenance
- Support filtering on any device and operating system
- Deploy 1:1 device programs with confidence
- Manage student devices at school, home, or anywhere
- Get user-level reporting on iPads with no login required
- Define custom policies to support off-network devices and BYOD
- Scale without bandwidth or other limitations
- Investigate flagged activities easily
- Download, schedule, and email reports

Now included with Securly Filter:

AI Chat for Securly Filter
Teach students how to responsibly use AI

- Keep an eye on students’ AI chats to identify misuse and ensure academic integrity is maintained.
- Tailor responses to student inquiries and provide guardrails to teach responsible AI usage.
- Rest easy knowing student data is protected and you’re complying with regulations.

Securly Reveal
Take the mystery out of measuring student app usage

- Know what apps are being used (or not), by whom, and how often to make data-backed license renewal and allocation decisions.
- Leverage usage analytics and trends to guide planning and purchasing decisions, and measure return on investment.
- Analyze usage data to identify where intervention, additional tech training, or PD may be needed.

Centralize on a single platform to simplify management

Securly has a suite of other products that work with Filter to help you do even more. Whether it’s student safety, engagement, or anything else, we have you covered. Integrations include:

<table>
<thead>
<tr>
<th>Securlyaware</th>
<th>Securely home</th>
</tr>
</thead>
<tbody>
<tr>
<td>Level up safety and wellness with AI-powered analysis of online activities, wellness monitoring, proactive interventions, and case management tools</td>
<td>Give parents/caregivers more control when devices go home and opportunities to get involved in their kids’ learning</td>
</tr>
</tbody>
</table>

Make security simple with cloud-based web filtering designed for schools

With easy setup, the highest-rated support, and unparalleled flexibility, Securly Filter streamlines and simplifies web filtering for busy school IT teams. Keep your students safe on all devices, whether at school, home, or anywhere in between.
